

2021–22 New Mexico Small Game **Voluntary Harvest Report**

Small game harvest is managed by the New Mexico Department of Game and Fish (Department). A Game Hunting License is required to legally take small game. Submission of a harvest report is voluntary, and license holders are able make submissions through the Department's online Harvest Reporting System. For license holders who submit a report, information is collected on if they hunted, what species of small game was harvested, the number harvested, and the county of harvest. Hunters may report hunting in more than one county. There were 36,066 license holders who voluntarily reported they did not hunt small game, 2,188 license holders who reported hunting without harvesting, and 2,318 who reported hunting and harvesting. The return rate of all game hunting license holders submitting a harvest report for small game was 22.6%.

Successful small game hunters submitted a total of 1,666 species harvest reports, with the potential that some hunters may have filed more than one report if they hunted multiple species. Of the license holders who filed a report, hunters were generally satisfied with their small game hunting experience in New Mexico. Species small game hunting satisfaction ratings ranged from 3.1 to 4.0 out of 5.

Fewer small game harvest reports were filed in 2021–22 compared to 2020–21 (Table 2). Though voluntary harvest reporting makes it hard to draw conclusions about trends in hunter numbers and harvests, there were likely fewer hunters in the field due to small game population declines caused by severe drought.

Small game harvest can be variable year to year. Small game populations are subject to extreme fluctuations due to annual weather conditions. Poor winter or spring moisture and extreme weather events can reduce the number of breeding adults or lead to poor reproductive success. During years of good weather conditions, populations can rebound very quickly.

This report summarizes the reported harvest data for all small game including: quail (scaled, Gambel's, northern bobwhite, and Montezuma), pheasants, dusky grouse, Eurasian collared-doves, and squirrels (Abert's, gray, red, and fox). Information provided from survey results assists the Department with development of recommendations for future small game harvest opportunities.

Table 2. Comparison of the annual number of harvest reports submitted and number of small game reported harvested.
